SUMMARY

Principal-level DevOps Engineer and Platform Engineering Leader with 15+ years architecting enterprise-scale infrastructure for Fortune 100 organizations. Specialized in shaping internal developer platforms that accelerate team velocity while ensuring reliability, security, and cost optimization. Defined and led enterprise-wide platform strategy including HashiCorp Vault for 1,000+ developers, multi-cloud architecture across AWS and Azure, and critical infrastructure migrations. Expertise in Kubernetes, Terraform, GitOps workflows, and modern DevOps practices. Delivered platform and architecture solutions for Weatherford, American Airlines, and The Coca-Cola Company.

- AWS & Azure Cloud Architecture
- Kubernetes & Container Orchestration
- Platform Engineering & Developer Enablement
- Cloud Migration & Modernization
- Terraform & Infrastructure as Code
- GitOps & CI/CD Pipeline Design
- Helm & FluxCD Deployment Automation
- HashiCorp Vault Platform & Strategy
- Security & SOC2 Compliance
- Ansible & Configuration Management
- GitHub Actions & Azure DevOps
- Prometheus & Grafana Monitoring
- Cost Optimization & Performance Tuning
- Team Training & Technical Leadership
- Cross-Functional Collaboration
- Certificate Lifecycle Management
- Secrets Management & Encryption
- Docker & Containerization

PROFESSIONAL EXPERIENCE

Umbrage Studios, LLC, Houston, TX (Remote)

November 2023 – Present

Senior DevOps Engineer

- Owned enterprise security automation for Coca-Cola, building relationships with Global Cloud Ops and earning DR design and approval authority for the application — delivering certificate lifecycle management, service principal rotation, and Azure DevOps integration for a greenfield application
- Defined multi-cloud architecture and cost analysis for American Airlines, delivering an Azure AKS proof-of-concept that informed their cloud strategy decision-making
- Architected production AWS EKS platforms for multiple business units using reusable Terraform modules, reducing environment provisioning from weeks to hours
- Led knowledge transfer and upskilling for 15+ engineers across Weatherford, TCCC, and Accenture during handoff, enabling team autonomy and reducing operational dependencies by 50%
- Architected GitOps workflows with FluxCD and established Helm chart standards adopted as the deployment template across 8+ microservices, dramatically improving reliability and release speed

Performance: Exceeds Expectations (2025)

GoldfeinClaims, LLC, Alpharetta, GA (Remote)

August 2022 – November 2023

Lead DevOps Engineer

- Architected AWS IAM least-privilege security framework across 200+ services, replacing ad-hoc permissions with custom EC2 role standards and establishing a remediation path for legacy misconfigurations
- Owned migration strategy and execution for 200+ EC2 instances using Terraform and Ansible, covering server migrations, configuration synchronization, and database administration across MSSQL and PostgreSQL environments
- Established automated certificate management using Let's Encrypt, eliminating manual SSL/TLS certificate renewals across infrastructure
- Standardized Dependabot security scanning for automated vulnerability detection and remediation
- Owned remediation of legacy Ruby infrastructure on AWS, standardizing deployment automation, resolving PostgreSQL migrations, and establishing database-level least-privilege practices across a debt-laden environment
- Established SOC2 compliance standards, tooling, and processes across AWS infrastructure and GitHub repository administration

Accruent, LLC, New Orleans, LA
Senior DevOps Engineer

May 2018 – August 2022

- Defined and owned Vault strategy for 1,000+ developers, architecting a fully automated 5-node Raft cluster with enterprise DR replication from the ground up
- Architected the automation ecosystem surrounding Vault — Ansible playbooks, Python/sh templated configuration, Terraform VMware provisioning, and Azure service principal automation — establishing reproducible, consistent environments across dev, QA, prod, and DR
- Led complex platform migrations including Octopus Deploy SQL to Azure and TeamCity JDK upgrades, navigating version compatibility and zero-downtime requirements
- Architected and deployed containerized Java applications to Rancher Kubernetes platform with F5 BigIP load balancer integration, modernizing application delivery and improving deployment reliability
- Drove enterprise-wide application containerization, establishing reproducible deployment patterns across the organization
- Defined AWS Lambda automation for EBS backups and multi-region synchronization, eliminating manual processes and establishing reliable disaster recovery workflows
- Administered enterprise Bitbucket repository governance supporting organization-wide development workflows

Capital One Financial Corporation, New Orleans, LA
Platform Engineer

April 2015 – May 2018

- Led AWS cloud migration efforts for Commercial Banking Technology division
- Automated EC2 AMI compliance and server rehydration using Terraform and CloudFormation
- Built and maintained CI/CD pipelines using Chef-Solo, Groovy, and Jenkins2

Collabera, New Orleans, LA
Business System Analyst (contracted to Capital One)

April 2014 – April 2015

- Produced technical documentation and process improvement for DR and contingency planning
- Established automated SiteScope monitoring for SLA metric tracking

Capital One Financial Corporation, New Orleans, LA
Online Banking Platform Manager (April 2013 – December 2013)

August 2011 – December 2013

- Managed platform infrastructure, application capacity, performance, and operational health in Agile environment

Senior Application Support Specialist (August 2011 – April 2013)

Solved business and application problems by analyzing impediments and driving resolution.

- Provided system training, administration, and analysis for Customer Access Request Engine supporting 200 users across multiple business divisions

iCONMA, New Orleans, LA
Web Developer I (contracted to Capital One)

August 2009 – August 2011

- Developed web solutions for content management systems using HTML, JavaScript, SQL, and Java for Capital One's Bank, Card, and Auto Loan divisions

EDUCATION and DEVELOPMENT

Tulane University, New Orleans, LA

Bachelor of Science, cum laude,
Applied Computing Systems and Technology,
Internet Application Development Concentration

Spring Hill College, Mobile, AL

Bachelor of Art, Studio Art
